Joint Network Node (JNN).—The Committee is concerned that the required operational test and evaluation has not been completed for the JNN and that final decision on the acquisition strategy for JNN and future evolutionary systems is not yet made. The conference report accompanying the fiscal year 2006 Department of Defense Appropriations Act contained a requirement that the Army submit a plan no later than January 15, 2006, detailing its plans to procure evolutionary capability in its network communications packages. The Army is still evaluating the program and has not submitted the report. Due to concerns about the Army's ability to execute the program while the contract strategy is still in question, the Committee reduces the program by \$100,000,000 and redirects an additional \$10,000,000 from "Other Procurement, Army" to the "Research, Development, Test and Evaluation, Army" appropriation to conduct the required operational testing.

Physical Security Systems.—The Committee supports the Army's program to acquire non-intrusive vehicle and cargo inspection systems to support ongoing operations in Iraq and Afghanistan. Since the terrorist threat was more fully recognized following September 2001, industry has made progress in developing innovative technologies to meet this critical need. The Committee directs the Department of the Army to use a competitive procurement process to fulfill the equipment requirements funded in the Physical Security Systems line.

V-22.—The Committee recommendation includes \$230,000,000 to procure three V-22 Osprey tilt rotor aircraft. The Osprey is the planned replacement for the CH-46E and CH-53D helicopters. Both legacy assets are suffering losses in battle and experiencing significant wear and tear in support of Operation Iraqi Freedom and Operation Enduring Freedom. Considering the CH-46E and CH-53D are no longer in production and nearing the end of their expected life, the Committee believes procurement of replacement aircraft needs to be accelerated to support Marine Corps operations. Now that the V-22 Osprey program has completed operational testing and entered full rate production, the Committee also believes the production efficiencies gained from this acceleration of replacement aircraft will result in substantial cost savings over the life of the program.

UH-1Y Aircraft.—The request includes \$74,000,000 to procure four UH-1Y aircraft. The Committee is aware that these funds are no longer executable in the current fiscal year. As a result, the Committee defers the funding to a future appropriations bill.

AV-8 Series.—The supplemental request includes \$31,947,000 to provide numerous upgrades and modifications to AV-8 aircraft. Several of the modifications appear to be upgrades not directly related to the global war on terror. In addition, a portion of the funds will not be obligated until fiscal year 2007. The Committee, therefore, reduces the request by \$10,000,000 and encourages the Navy to pursue modification efforts in the traditional appropriation process.

H-53 Series.—The Committee recommendation transfers \$2,000,000 from the "Research, Development, Test and Evaluation, Navy" account to the "Aircraft Procurement, Navy" account to provide Blue Force Tracker/Moving Map capability for H-53s. Subsequent to the budget submission, it was determined this work is more properly funded in the procurement account.

E-2 Series.—The Committee recommendation denies \$3,420,000 requested for E-2C and C-2 cockpit instrument lighting. The Committee notes this request is an upgrade to existing cockpit lighting and is not urgently needed in support of Operation Iraqi Freedom or Operation Enduring Freedom.

C-130 Series.—Subsequent to the budget submission, the Committee was informed that \$3,691,000 requested for KC-130T ALE dispensers is no longer a requirement. As a result, the Committee denies this request.
